

To fix and commit cleanly

Run these commands **inside your project root**:

1 Stage all the changes

```
git add .
```

2 Check everything looks correct

```
git status
```

You should now see the changes listed under “Changes to be committed”.

3 Make a commit with a clear message

```
git commit -m "Migrated to Tailwind CSS v4, updated config files, and fixed React setup"
```

4 (Optional) Push to GitHub

If you’re using GitHub:

```
git push
```
